1.OBJECTIVES

Event management system is a web application, used for all event organizers. Now a days all event managers doing their business through online. Authorization and authentication of user is done through online. Customers can search for various events and their prices through online.

Cherry pick in our project:

In our project customer can book for event.

- 1) Display all events
- 2) About us page
- 3) Contact us page

[Type text]

[Type text]

2.INPUT AND OUTPUT

Input Forms in our project:

- 1) Event booking form

Output Pages in our project:

- 1) Display All events Page
- 2) About us page
- 3) Contact us page

Type text]

[Type text]

3.DETAILS OF MODULES

Our Project having Three Modules:

- 1) Admin Module
- 2) Users Module
- 3) Events module

In Admin Module, admin login form having admin username and password. If these values are matched with backend database values, then only admin gets authentication to the server. After authentication, admin control panel will be displayed.

In Users Module, user can register and login to his account. If these values are matched with backend database values, then only admin gets authentication to the server. After authentication, user control panel will be displayed.

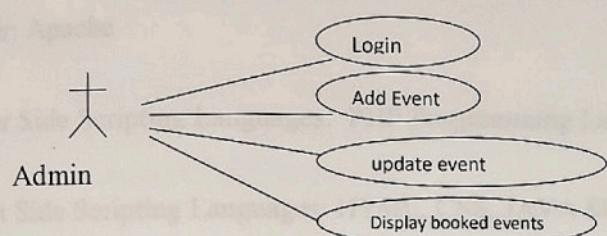

In Events module, user can book a module. Admin can view all booked events.

[Type text]

8. OUTPUT SCREENS

3) customer:

Field	Type	Null	Key	Default	Extra
custid	int(5)	NO	PRI	<i>NULL</i>	auto_increment
name	varchar(20)	NO		<i>NULL</i>	
mobile	bigint(10)	NO		<i>NULL</i>	
email	varchar(20)	NO		<i>NULL</i>	
pwd	varchar(20)	NO		<i>NULL</i>	
repwd	varchar(20)	NO		<i>NULL</i>	

4) Events:

Field	Type	Null	Key	Default	Extra
Eventide	int(5)	NO	PRI	<i>NULL</i>	auto_increment
eventname	varchar(30)	NO		<i>NULL</i>	
Price	bigint(10)	NO		<i>NULL</i>	

8.OUTPUT SCREENS

1) Home Page:

The screenshot shows a web browser window with the URL `localhost:26-2-19/events`. The page title is "Welcome to Sekhar Events". Below the title, a sub-header reads "WE PROVIDE ALL TYPES OF EVENTS FOR YOU.". A section titled "Events we provide" contains a table listing three event types: Birthday Events, Marriage Events, and Friends Events. Each entry includes a description and a price of 10000 per day.

Event ID	Event Name	Description	Price
100	Birthday Events	we provide birthday events. we provide you all the services for birthday events	10000 per day
101	Marriage Events	we provide marriageg events. we provide you all the services for marriage events	10000 per day
102	Friends Events	we provide friends events. we provide you all the services for friends events	10000 per day

In this events management project, user can book an event..

{Type text}

2) About us page:

The screenshot shows a web browser window displaying an 'About Us' page. The URL in the address bar is `localhost:26-2-19/area/2`. The page has a header with a house icon, 'About Us', 'Contact Us', and 'Book an event' buttons. The main content features a large heading 'This is aboutus page' and a sub-section 'WE SEKHAR EVENTS ESTABLISHED IN 2016. WE SUCCESSFULLY COMPLETED 3 YEARS OF SERVICE. WE PROVIDE PERFECT EVENTS TO CUSTOMERS.' Below this is a section titled 'Events we provide' with a table listing three types of events: Birthday Events, Marriage Events, and Friends Events, each with a description and price of 10000 per day.

This is aboutus page

WE SEKHAR EVENTS ESTABLISHED IN 2016. WE SUCCESSFULLY COMPLETED 3 YEARS OF SERVICE.
WE PROVIDE PERFECT EVENTS TO CUSTOMERS.

Events we provide

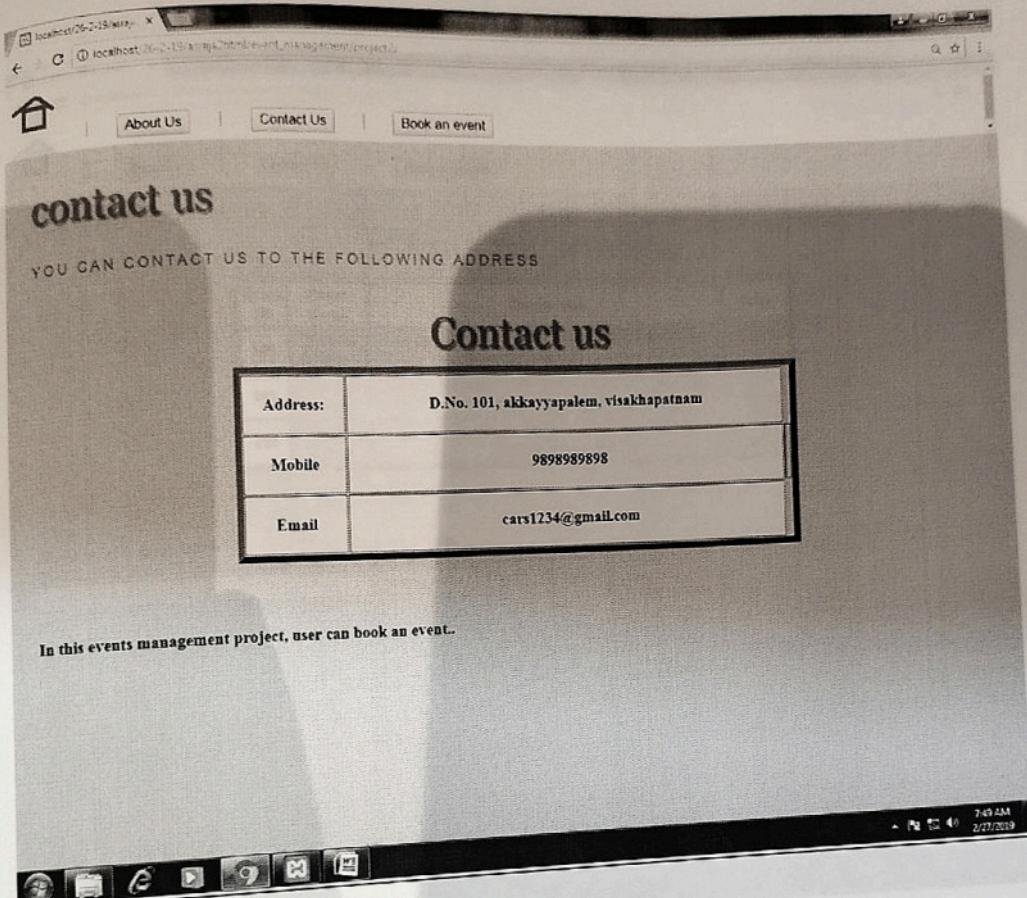

Event ID	Event Name	Description	Price
100	Birthday Events	we provide birthday events. we provide you all the services for birthday events	10000 per day
101	Marriage Events	we provide marriage events. we provide you all the services for marriage events	10000 per day
102	Friends Events	we provide friends events. we provide you all the services for friends events	10000 per day

In this events management project, user can book an event..

3) Contact us page:

Book an event page:

[Type text]

[Type text]

- 4) Book an event page:

The screenshot shows a web browser window with the URL `localhost:202-18/arasa/html/event_management/object2`. The page title is "Events we provide". At the top, there are navigation links: Home, About Us, Contact Us, and Book an event. Below the title is a table listing three event types with their descriptions and prices. A form for booking an event is present at the bottom.

Event ID	Event Name	Description	Price
100	Birthday Events	we provide birthday events. we provide you all the services for birthday events	10000 per day
101	Marriage Events	we provide marriageg events. we provide you all the services for marriage events	10000 per day
102	Friends Events	we provide friends events. we provide you all the services for friends events	10000 per day

If you want to book an event, please fill the following details.
Please enter event ID & event name:

[Type text]

[Type text]

5) Booking completion page:

The screenshot shows a web browser window with the URL `localhost:25-2-15/erajy.../localhost:11-2-15/erajy.../index.php`. The page title is "Events we provide". At the top, there are navigation links: "About Us", "Contact Us", and "Book an event". Below the title is a table listing three types of events:

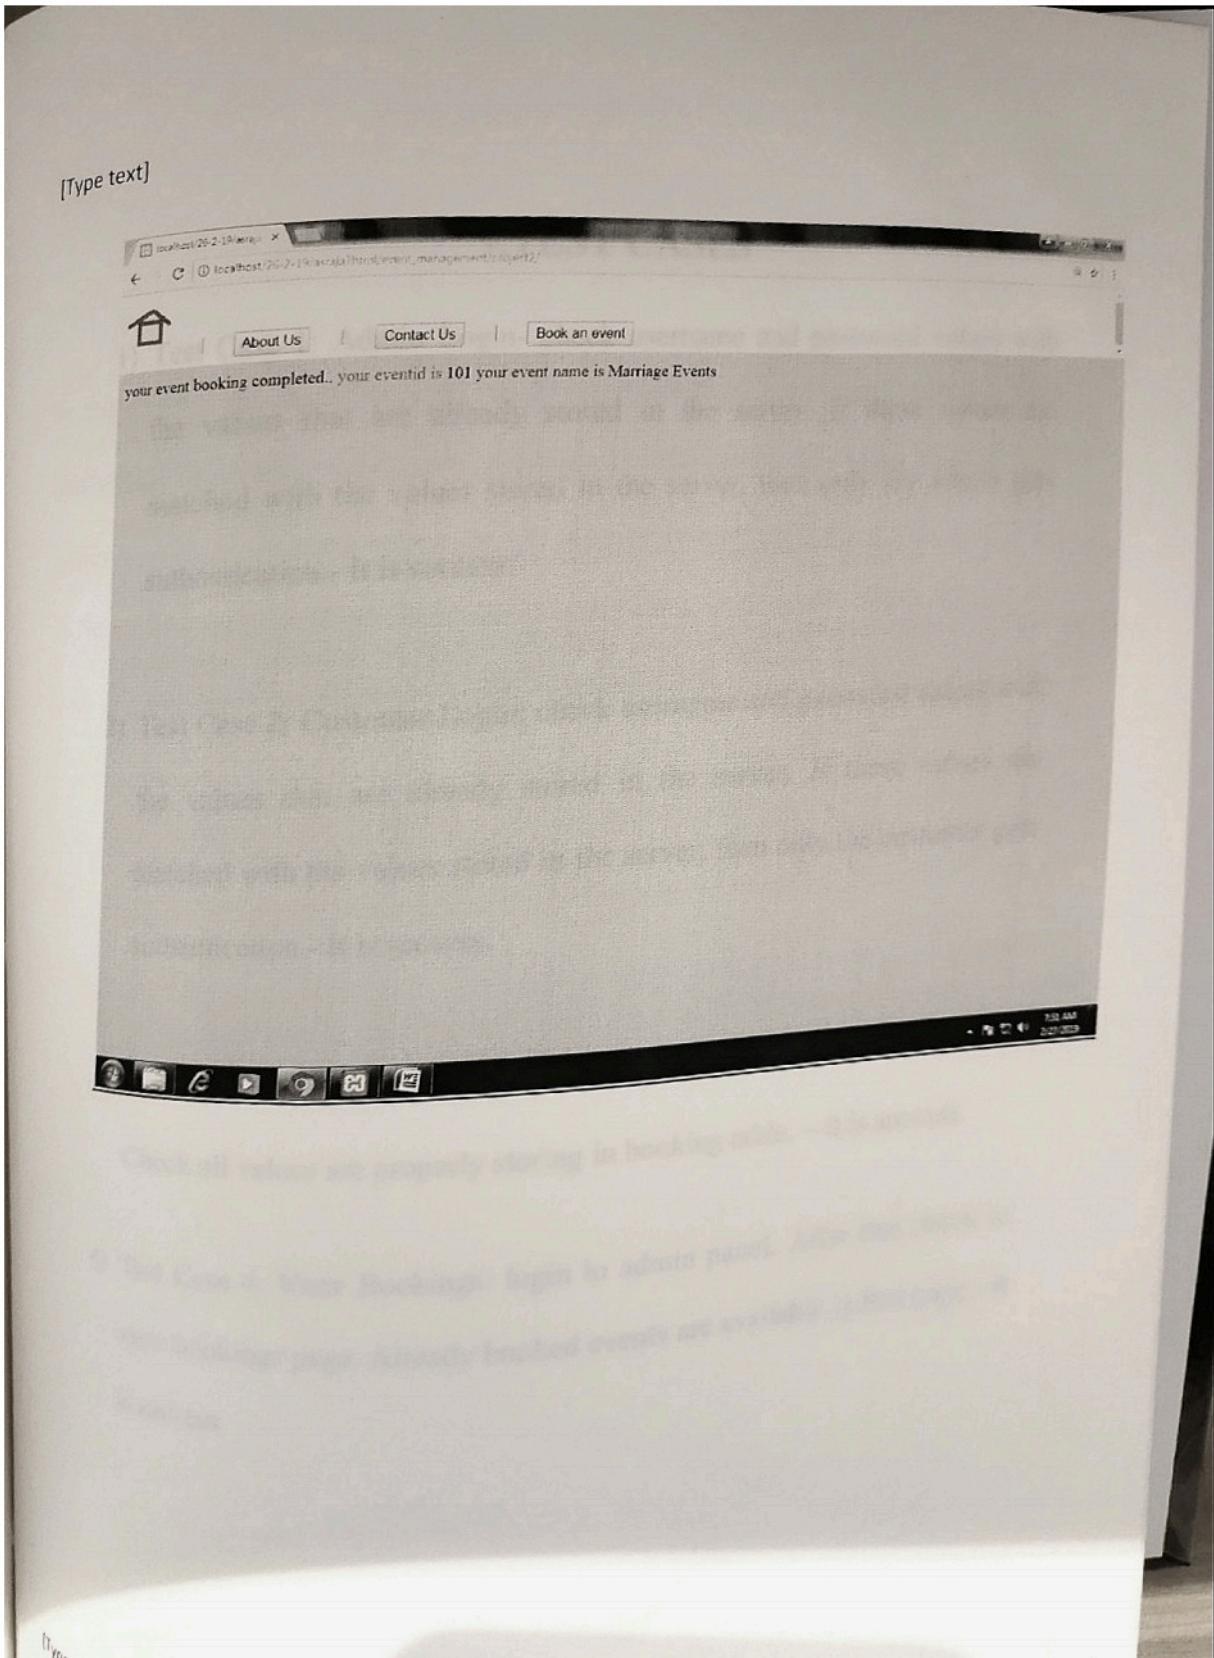

Event ID	Event Name	Description	Price
100	Birthday Events	we provide birthday events. we provide you all the services for birthday events	10000 per day
101	Marriage Events	we provide marriage events. we provide you all the services for marriage events	10000 per day
102	Friends Events	we provide friends events. we provide you all the services for friends events	10000 per day

If you want to book an event, please fill the following details.
Please enter event ID & event name:

101

At the bottom right of the browser window, the system tray shows icons for battery, signal, and date/time (7:52 AM, 2/27/2018).

[Type text]

9.TEST CASES

- 1) Test Case 1: Admin Login- check username and password values with the values that are already stored in the server. If these values are matched with the values stored in the server, then only the admin gets authentication.- It is success.
- 2) Test Case 2: Customer Login: check username and password values with the values that are already stored in the server. If these values are matched with the values stored in the server, then only the customer gets authentication.- It is success.
- 3) Test Case 3: Book Event: first search for event. After that book event. Check all values are properly storing in booking table. – it is success.
- 4) Test Case 4: View Bookings: login to admin panel. After that check in view bookings page. Already booked events are available in that page.- it is success.

[Type text]

10. LIMITATIONS OF PROJECT

In this project we developed all the functionalities of event organizations. Here limitations are, this project not contains all the roles of event management employees. Here we used only admin to manage and maintain applications. In real world applications, multiple branches of customers exist. Here in this project we used only one branch customers for event organization.

[Type text]

[Type text]

11. SCOPE OF FUTURE REFERENCE

This project is very much used in future for event management related applications. Here, we developed this application with fully secured server side scripting language PHP. All the functionalities of event management application are included in this project.
